Philosophy of Recreation

We believe that each person is unique, with individual needs, interests, abilities and desires. Furthermore, that each person despite disabilities, illness or other limited conditions and regardless of place of residence, has the right to a meaningful life. Residents should also expect to be treated with respect and dignity at all times.

As Recreation Professionals we play a vital role in the overall quality of life for each individual within the facility. We continually strive to create an enriching and humanizing atmosphere within the scope of our recreation programming.

All our programs are designed to meet the needs of each resident, and we will ensure that each person is provided with opportunities to participate as they desire.

We also keep in mind that individual independence is important and must be encouraged for as long as possible. When physical or mental capabilities prohibit involvement, programs will be adapted as necessary so that each person can achieve their own level of independence within that program.

The qualifications for Recreation Professionals must reflect the specialized needs of a growing and diverse population. Therefore we maintain that all recreation programming be designed and implemented by qualified Recreation Staff and may be assisted by volunteers.

Recreation Services

We provide a monthly calendar of events, so that residents and families know what the program schedule is for the month and can choose where they want to participate.

For more information on any of the programs or to volunteer, please contact Meadowood Manor at: Phone: 257-2394
